

Michael Thielen

Extrusion Blow Molding,

Table of contents

Preface	V
The Author	VI
1 Introduction	1
1.1 Hollow Plastic Parts - What Are They for?	1
1.2 Processes to Produce Hollow Plastic Parts	1
1.2.1 Thermoplastics	1
1.2.2 Thermosets	2
1.3 Application Areas for Blow Molded Hollow Parts	3
1.4 History of Blow Molding Hollow Parts	8
2 Extrusion Blow Molding	15
2.1 Process Sequence for Extrusion Blow Molding	15
2.2 Raw Materials	17
2.2.1 Plastics	17
2.2.2 Plastics for Extrusion Blow Molding	22
2.3 Machine Technology	24
2.3.1 Basic Structure of a Blow Molding Machine	24
2.3.2 Extruders and Screws	24
2.3.2.1 Smooth-Bore Extruder	25
2.3.2.2 Extruder with Grooved Feed Zone	27
2.3.2.3 Gravimetric Throughput Control	30
2.3.3 Parison Heads	32
2.3.3.1 Spider Heads	32

2.3.3.2	Mandrel Heads.....	34
2.3.3.3	Spiral Heads	36
2.3.4	Continuous/Discontinuous Extrusion	38
2.3.5	Wall Thickness Control.....	41
2.3.5.1	Swelling Behavior of the Parison.....	43
2.3.6	Systems for Influencing the Radial Wall Thickness Distribution	46
2.3.6.1	Why Radial Wall Thickness Control?.....	46
2.3.6.2	Statically Flexible Deformable Ring (SFDR®)	46
2.3.6.3	Partial Wall Thickness Distribution System (PWDS®) .	47
2.3.6.4	Wall Thickness Layer Control.....	52
2.3.7	Clamping Units.....	56
2.3.8	Controls.....	61
2.3.8.1	IPC Control (Industrial PC).....	63
2.3.9	Cooling.....	64
2.3.9.1	Shrinkage and Warpage.....	64
2.3.10	Air	67
2.3.11	Single-/Multiple-Head Systems.....	68
2.3.11.1	Long Stroke Machines	69
2.3.12	Single/Double Station Machines.....	70
2.3.12.1	Combinations of the Two Principles.....	71
2.3.13	Rotary-Wheel Blow Molding Systems	72
2.4	Blow Molding Tools	74
2.4.1	Mold Layout	74
2.4.1.1	Prototype Molds in Cast Resin Construction	75
2.4.1.2	Prototype Molds with Metal Surface and Cast Resin Backing	75
2.4.1.3	Cast Metal Prototype Molds	75
2.4.1.4	Aluminum Prototype Molds	76
2.4.1.5	Mass-Production Molds	76
2.4.2	Design Guidelines	79
2.4.2.1	Blow Mold Guide	79
2.4.2.2	Cutting Edges	79

2.4.2.3	Mold Support	82
2.4.2.4	Mold Venting	82
2.4.3	Blow Mold Cooling	84
2.4.3.1	Drilled Cooling	84
2.4.3.2	Milled Cooling	85
2.4.3.3	Cast-in Pipe Cooling	85
2.4.4	Blow Mold Accessories	87
2.4.4.1	Masks	87
2.4.4.2	Spreader Pins	87
2.4.4.3	Blow Pin	88
2.4.4.4	Calibration Pin and Calibration Blow Pin	89
2.4.4.5	Blow Needle	90
2.4.4.6	Parison Closing Device	92
2.4.4.7	Stripper Plate	92
2.4.4.8	Head Tool (Die and Core)	92
2.4.4.9	Set-up Socket	93
2.4.5	Process-Integrated Follow-up Procedures	93
2.4.5.1	Post-Cooling with a Post-Cooling Mold	93
2.4.5.2	Complete Processing in the Blow Molding Machine ..	94
2.4.6	Injection Blow Molding and Dip Blow Molding	96
2.4.7	Use of Computers in Blow Mold Construction	97
2.5	Downstream and Auxiliary Equipment	98
2.5.1	Cooling Units	99
2.5.2	Compressors	100
2.5.3	Dryer	100
2.5.4	Deflashing	100
2.5.5	Grinder	101
2.5.6	Material Handling	102
2.5.7	Post-Cooling	104
2.5.8	Leak Test	105
2.5.9	Filling	106
2.5.10	Capping/Closing	106
2.5.11	Labeling	106

2.5.12	Printing.....	106
2.5.13	Packaging.....	106
2.5.14	Further Peripheral Devices.....	107
2.6	Special Process Variants	107
2.6.1	Multilayer/Coextrusion Blow Molding	107
2.6.1.1	Coextrusion with Barrier Layer	108
2.6.1.2	Machine Technology for Multilayer/Coextrusion.....	108
2.6.1.3	Plastic Fuel Tank (PFT)	109
2.6.2	Sheet Forming for the Production of Fuel Tanks	114
2.6.3	3D Blow Molding.....	114
2.6.3.1	Different Machine Technologies.....	117
2.6.3.2	3D Blow Molding and Coextrusion with Barrier Layer.....	122
2.6.3.3	Radial Wall Thickness Control.....	122
2.6.4	Sequential Coextrusion.....	123
2.6.4.1	Process Technology of Sequential Coextrusion.....	125
2.6.4.2	Machine Technology of Sequential Coextrusion.....	126
2.6.4.3	Production Target: Stable Processing Conditions	127
2.6.5	Extrusion Blow Molding of Polycarbonate Water Bottles.....	128
2.6.5.1	Advantages of PC	129
2.6.5.2	Machine Technology for PC Water Bottles	130
2.6.6	In-Mold Labeling	131
2.6.7	View Stripe Equipment.....	132
2.6.8	In-Mold Decoration	133
2.6.9	Blow Molding Foam Technology (BFT).....	134
2.6.10	MuCell.....	136
2.6.11	Blow Molding of Fiber-Reinforced Thermoplastics	138
2.6.12	Blow-Fill-Seal Process	138
3	Product Development	143
3.1	Product Trials and Testing	144
3.2	Designing for Blow Molding.....	145
3.3	CAE, Simulation Procedures: Process and Product Simulation	149

3.4	Product Development in Extrusion Blow Molding	151
3.5	Feasibility Analysis Sandbox.....	152
3.6	Calculation of the Internal Burst Pressure of a Windshield Wiper Water Tank	154
4	The Blow Molding Operation	159
4.1	From the Idea to the Product.....	159
4.2	Changeover.....	165
4.3	Layout of a Blow Molding Process	168
5	Recycling in Extrusion Blow Molding Technology	171
5.1	Possible Strategies for Processing Regrind.....	172
5.2	Layer Structures for Blow Molded Parts with Recycled Material.....	173
5.3	Recycling in Six-Layer Coextrusion.....	174
5.4	Preparation of the Material.....	176
5.5	Material Conveying, Dosing, and Plastification	176
5.6	Mass Flow Rate	178
5.7	Avoiding Defects	180
5.8	Blow Head, Blow Mold, and Blow Molding Process	180
	Appendix: Formula Symbols, Abbreviations, and Short Codes.....	183
	Index	187
